Watchtower data catalogue

Edition reviewed 31 October 2026 · 84 inventoried application surfaces · 395 normalized point definitions · 218 reviewed API/MCP route paths. Counts have different units; source dates and access limits remain authoritative.

Registered metadata, not a catalogue of live prices. Legacy response counts retain their original dates in the online catalogue; source availability and entitlements vary.

Reviewed API/MCP interfaces

Air EWS

Latest available reviewed Air EWS response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/air-ews`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Alt Dollar Stress

Latest available reviewed Alt Dollar Stress response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/alt-dollar-stress`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Alternative Economics Catalog

Latest available reviewed Alternative Economics Catalog response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/alternative-economics-catalog`

Alternative Economics Dashboard

Latest available reviewed Alternative Economics Dashboard response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/alternative-economics-dashboard`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Ancient Map source collection and historical frames

The actual installed Ancient Map metadata and original reconstructed geometry, with per-image licences, GPL geometry credits and separate source/depicted dates. Images are not geographically registered; boundaries are dated references, not current control.

`/agent/api/ancient-map-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Application-to-MCP coverage inventory

Dated shared-data access reconciliation. Working read paths, complete structural access, source pagination, keyword coverage and history are separate. Private account/workspace/credential/mutation surfaces remain excluded. Client-local calculations and external media remain explicitly classified.

`/agent/api/application-coverage`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Asteroid Threats

Latest available reviewed Asteroid Threats response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/asteroid-threats`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Aviation Tracker

Public aircraft observations and source clocks, bounded up-to24hour retained coordinate history, retrospective replay, viewport grid counts, airport/runway references and source-qualified aviation weather/FAA context. Not exhaustive global tracking, verified flight legs or a worldwide NOTAM service. ODbL1.0/ADSB.lol and per-context attribution retained. Personal cloud state and customer-paid provider results are excluded from this public route.

`/agent/api/aviation-tracker`

Route access: public. Preserve source-native pagination and coverage qualifications.

Bank CDS Reference

Latest available reviewed Bank CDS Reference response. Preserve source dates, units, coverage and any missing/stale states.

Latest available reviewed Biosecurity Risk response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/biosecurity-risk`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Bond yields and fixed-income data

Existing bond/yield response with source periods and units. A yield is not a bond price and a maturity curve is not price history.

`/agent/api/bonds`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Bullion Premiums

Latest available reviewed Bullion Premiums response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/bullion-premiums`

Calendar

Latest available reviewed Calendar response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/calendar`

Route access: public. Preserve source-native pagination and coverage qualifications.

Camera Catalog Evidence

Metadata projection of the existing legacy public camera catalogue. Source/bbox filters and source-selected limits apply. Stream URLs, broker objects, restream configuration, playback and private CCTV snapshots are excluded.

`/agent/api/camera-catalog-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cameras World

Public catalogue metadata and community-mapped OSM Flock/ALPR locations. Not live plate records or independently verified camera operation. Media playback, streams, restream commands and binary downloads excluded; use records pages for metadata.

`/agent/api/cameras/world`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cat Insurance Stress

Latest available reviewed Cat Insurance Stress response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/cat-insurance-stress`

Conflict Network

Latest available reviewed Conflict Network response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/conflict-network`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Conflict Research

Read-only public source evidence and authored context. Narrative cutoff, source periods, provisional/location precision, separate stocks/flows and source support qualifications retained. No private watches, mutations, force refresh, inferred war probability/initiator or operational targeting.

`/agent/api/conflict-research`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Corporate Credit Dossier

Period-qualified public SEC financial evidence. Read financials.periods, facts, debt, metricQuality and ratioQuality. Null ratios and withheld scores are missing/incompatible/stale, not zero. Synthetic CDS basis points are not supplied. Licensed owner-private connections are excluded.

`/agent/api/corporate-credit-dossier`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country Calendar Signals

Reported calendar releases and consensus. Pending or nonnumeric actuals have null surprises and explicit comparisonStatus; never treat a scheduled row as an observed result. Original reference periods and source clocks retained.

`/agent/api/country-calendar-signals`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country Commodity Production

Latest available reviewed Country Commodity Production response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-commodity-production`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country credit rating references

Source-qualified country rating references; preserve agency, scale, scope and source/action dates rather than implying independent current-rating certification.

`/agent/api/country-credit-ratings`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country Crime Monitor

Latest available reviewed Country Crime Monitor response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-crime-monitor`

Route access: public. Preserve source-native pagination and coverage qualifications.

Country Demographics

Latest available reviewed Country Demographics response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-demographics`

Latest available reviewed Country Dossier response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-dossier`

Route access: public. Preserve source-native pagination and coverage qualifications.

Country Encyclopedia

Latest available reviewed Country Encyclopedia response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-encyclopedia`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country Facts

Latest available reviewed Country Facts response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-facts`

Route access: public. Preserve source-native pagination and coverage qualifications.

Country Risk

Public country-risk composite and source-qualified fiscal fields. debt.governmentFinance distinguishes total expenditure, expense proxy, general/central scope, consolidation, years and source eligibility. No raw summation of government levels; heuristics are not event probabilities.

`/agent/api/country-risk`

Route access: public. Preserve source-native pagination and coverage qualifications.

Country Source Pack

Latest available reviewed Country Source Pack response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-source-pack`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Country Trade Annual

Latest available reviewed Country Trade Annual response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/country-trade-annual`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Crash Warning Radar

Latest available reviewed Crash Warning Radar response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/crash-warning-radar`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Credit Derivatives Risk

Latest available reviewed Credit Derivatives Risk response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/credit-derivatives-risk`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Credit Evidence

Short public rating-reference fields and public credit disclosures. Agency scale/action/status/source dates explicit; no current-rating certification or agency research mirror. CDS spreads/coupons/upfronts distinct, lifecycle and overlap retained. No model proxy promoted to observed CDS, no private accounts/licensed provider data/force/customURLs.

`/agent/api/credit-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Credit Issuer Evidence

Public SEC evidence only; exact reporting CIK, dated source periods and complete calculation components. No assumed LEI, borrower/guarantor substitution, agency score or synthetic CDS. Private exposures/reviews/scenarios/feedback remain excluded. Missing or stale inputs stay qualified.

`/agent/api/credit-issuer-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Crime Command

Latest available reviewed Crime Command response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/crime-command`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Crime Live Events

Latest available reviewed Crime Live Events response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/crime-live-events`

Route access: professional. Preserve source-native pagination and coverage qualifications.

`/agent/api/crime-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cross Domain Alerts

Latest available reviewed Cross Domain Alerts response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/cross-domain-alerts`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cross-asset market overview

Existing cross-asset market overview. Preserve instrument identity, currency, price versus yield distinctions, and each source timestamp.

`/agent/api/market-overview-live`

Route access: public. Preserve source-native pagination and coverage qualifications.

Crypto Token Intel

Latest available reviewed Crypto Token Intel response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/crypto-token-intel`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Crypto World Evidence

Latest available reviewed Crypto World Evidence response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/crypto-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cryptocurrency market prices

Aggregated market snapshots, not executable quotes. Native cache can return last-known values after upstream failure; assess last_updated for freshness. Missing values remain missing.

`/agent/api/crypto-markets`

Route access: public. Preserve source-native pagination and coverage qualifications.

Cyber Infra Risk

Latest available reviewed Cyber Infra Risk response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/cyber-infra-risk`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Cyber World Evidence

Latest available reviewed Cyber World Evidence response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/cyber-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Daily provider market-price history

Source-reported daily history with original bar dates and source identity, durably queued when archive admission succeeds. Available trading days only; no weekend/missing-day interpolation. Historical-only or retained-stale series are not live quotes. Use market-history-ledger for stored date-filtered rows and revisions.

`/agent/api/market-price-history`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Data coverage and durable-history inventory

Reconciles complete public Atlas rows, retained indexed field groups and archive captures/revisions/bars. Counts are different units and can overlap; not all-world completeness or universal live-price certification. Use application-coverage for the workspace-to-MCP access and field/pagination inventory.

`/agent/api/data-inventory`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Debt World Evidence

Reported debt evidence remains separate from model rates. dataset=clocks: dated BIS USD stocks, exact annual input history, sector-specific covered economies, projection/source-expiry bounds. No complete all-world claim; no private board pins or upstream polling.

`/agent/api/debt-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Deposits Liquidity

Latest available reviewed Deposits Liquidity response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/deposits-liquidity`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Digital Money World

Primary-source project evidence, BIS 2020–2024 survey vintages/denominators, pilot-scale measurements, observed milestones versus future targets, source-change/review history and prospective stablecoin capture histories. Separate retail/wholesale/private liabilities. Research prototypes do not establish national CBDC deployment. No automatic stage promotion, adoption inference, private state or source forcing. Source qualifications and missing values remain explicit; history is bounded and not backfilled.

`/agent/api/digital-money-world`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Drone Incidents

Latest available reviewed Drone Incidents response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/drone-incidents`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Durable source evidence and revisions

Captured shared/public source evidence only. Original reporting/observation and capture clocks, revisions, missing values and model qualifications retained. Geometry stays in snapshot payloads. Request text, user-authored studies and private/account/provider credentials excluded. No age pruning; admission pauses at documented storage bounds.

`/agent/api/evidence-history`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Earnings Calendar

Latest available reviewed Earnings Calendar response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/earnings-calendar`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Economic Calendar

Public source schedules and reported values. Unknown clocks are not UTC; priorities are labelled; actual/forecast/previous units stay distinct. Source coverage and retained history are bounded; local watchlists excluded.

`/agent/api/economic-calendar`

Route access: public. Preserve source-native pagination and coverage qualifications.

Eurodollar Series History

Latest available reviewed Eurodollar Series History response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/eurodollar-series-history`

Route access: professional. Preserve source-native pagination and coverage qualifications.

External Intel

Latest available reviewed External Intel response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/external-intel`

Route access: public. Preserve source-native pagination and coverage qualifications.

Financial Stress Evidence

Existing read-only Financial Stress service snapshot and source-dated evidence. Source staleness, partial coverage, model versions and authored-scenario labels retained. Illustrative scenario scores are not probabilities. No private provider connections or service administration.

`/agent/api/financial-stress-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Financial Stress Expanded

Latest available reviewed Financial Stress Expanded response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/financial-stress-expanded`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Flights

Latest available reviewed Flights response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/flights`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Forecast Calibration

Latest available reviewed Forecast Calibration response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/forecast-calibration`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Forecast Lab

Public empirical market research and prospective shadow ledger, existing authored cross-domain scenarios, official/model weather and source schedules. Historical reconstruction is not original-vintage/live skill; no established calibration. Owner-local watches excluded. Energy: source-dated regional prices and global benchmarks, sampled delivery-month futures, uncalibrated historical-data projections, production-country warning context and explicit user-authored supply sensitivities.

`/agent/api/forecast-lab`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Freedom Prosperity

250 country/territory references; qualified professional tax facts, dated fiscal statistics and historical fee benchmarks, selected official registry charges. Authored fixed-weight sensitivity bounds are not effective tax liabilities or calibrated probabilities. Missing and conditional inputs remain unknown.

`/agent/api/freedom-prosperity`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Fund Flow Risk

Latest available reviewed Fund Flow Risk response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/fund-flow-risk`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Funding Liquidity

Latest available reviewed Funding Liquidity response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/funding-liquidity`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Geopolitical Futures

Read-only public history/resource projection and explicit strategic tabletop assumptions. Country-border event-presence models are not attacker/pair-onset forecasts. Source dates, units, separate record types, historical polity identities and unknowns retained. No private cases/provider credentials, tactical routes, mutations or force-refresh.

`/agent/api/geopolitical-futures`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Geopolitical Outlook

Public outlook context. Country governmentFinance retains source-qualified debt and total expenditure when supplied by the country-risk snapshot. Global forecast scope and calibration qualifications remain.

`/agent/api/geopolitical-outlook`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global Bond Intel

Existing professional read-only Global Bonds payload. sovereignDebt.rows and map.countryRows include governmentFinance provenance and separate governmentExpenditurePctGdp. Expenditure is fiscal context, not an additional Bonds score component. Original source clocks and coverage limits apply.

`/agent/api/global-bond-intel`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global Finance Counters

Official reported stock series. Native-currency offshore credit and Hong Kong-only RMB deposits; supplemental BIS derivatives slices. Not complete Eurocurrency money supply or net loss exposure. Histories, original periods, source dates, gaps and stale flags retained; no forced polling/private data.

`/agent/api/global-finance-counters`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global fuel prices

Source-qualified fuel price observations. Retain location, source currency, fuel unit and reference period; do not combine unlike measures.

`/agent/api/global-fuel-prices`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global Market Lookup

Bounded public Yahoo/TradingView instrument candidates; not a complete exchange directory. Quotes remain source-dated references. Missing prices/timestamps not inferred; exact listing and currency retained. Other Watchtower records/data points use existing permission-aware search. No private provider credentials, force or arbitrary URLs.

`/agent/api/global-market-lookup`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global Politics

Latest available reviewed Global Politics response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/global-politics`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global Risk Overview

Read-only public normalized evidence-pressure indices, country/region coverage and full public point inventory. Not calibrated event probabilities. Unknown/expired/missing data excluded; source-native periods and country associations retained. Original systemic forecasts and immutable outcomes remain separately accessible. No private watches, owner data or source-force reads.

`/agent/api/global-risk-overview`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global satellite orbit references

Public orbital reference data. Element epochs, capture times and propagated positions are distinct; propagated positions are not direct sensor observations.

`/agent/api/satellites/global`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global stock index references

Global benchmark index evidence. Preserve exact index identity and source/bar timestamps; reference values are not automatically streaming trade prices.

`/agent/api/global-index-markets`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Global stock market data

Existing global stock-market response with its native source coverage, currency, quote clocks and missing-data qualifications.

`/agent/api/global-stocks`

Route access: public. Preserve source-native pagination and coverage qualifications.

GNSS Interference

Latest available reviewed GNSS Interference response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/gnss-interference`

Route access: public. Preserve source-native pagination and coverage qualifications.

Government Official Feeds

Reviewed government-office publications and secondary-directory-discovered government-domain feeds retain separate authority labels. Officeholder/institution associations are secondary references, not an independently verified current roster. Official publication is not independent verification of a claim. X account references are links only; posts are not ingested. Missing or undated updates do not mean zero activity. Read-only collected public evidence; no arbitrary URL, credentials, forced refresh or owner data. Coverage and source failures remain explicit.

`/agent/api/government-official-feeds`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Grid US Power

Latest available reviewed Grid US Power response. Preserve source dates, units, coverage and any missing/stale states.

Insurance Stress

Latest available reviewed Insurance Stress response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/insurance-stress`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Insurance World Evidence

Existing read-only insurance statistics plus source-qualified worldwide stress context. Original zones/company scores are authored legacy proxies. Hazard observations, notices/forecasts, reported military/unrest and provisional history remain distinct; named-place/country anchors are not verified event GPS. Source counts are not unique incidents, claims or insured losses. No private military command, owner/provider data, invented carrier exposure or new blended insurance score.

`/agent/api/insurance-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Intel Matrix

Latest available reviewed Intel Matrix response. Preserve source dates, units, coverage and any missing/stale states.

`/agent/api/intel-matrix`

Media Intel

Reviewed source records and classification evidence. Rumble publisher-reference titles/dates belong to referring articles; channel-only directory entries are excluded from connected-feed counts. No private lists, accounts or complete platform timelines. Social reporting style, excerpt framing cues and source-level leaning are separate. Limited English framing rules expose matched and suppressed wording; no individual political profile or accuracy rating. No engagement-based ranking.

Natural hazards command

Source-qualified hazard observations and issued warnings; retain event/issue/validity clocks, lifecycle and coverage rather than treating all records as current incidents.

`/agent/api/natural-hazards-command`

Route access: public. Preserve source-native pagination and coverage qualifications.

Natural Hazards Evidence

Read-only source-qualified supplement to Natural Hazards Command. Includes all still-valid retained Weather Alerts records, current-source volcanic bulletins, published airborne ash areas/forecasts, report-based landslides, and geological/model reference layers. Source timestamps, geometry and capture time are distinct. VAAC airborne ash is not ground ashfall/PDC impact geometry; no synthetic cones. COOLR may be historical. GEM is a dated reference with regional gaps. LHASA provider-latest raster lacks a run timestamp. Snow depth is only supplied where native source data exists; no rain-to-snow ratio. Follow both source and MCP pagination.

Public Finance

Central-bank total assets and statement components; central-government financial-only stocks; Canadian public accounts; fiscal outturns and WDI fiscal context; budget/account document links. These are different accounting measures, not universal audited statements or enacted budgets. Keep source units, multipliers, periods, raw decimal values, statuses and retained-source clocks. Do not add parent/subtotal rows, Eurosystem and national central banks. No changes to hyperinflation model outputs. Read-only collected public evidence; no arbitrary URL, credentials, forced refresh or owner data. Coverage and source failures remain explicit. Deficits view includes different source sign conventions and separate primary/cyclically adjusted balances. IMF WEO/Fiscal Monitor series mix historical values, estimates and projections, not government budget proposals; per-observation actual/estimate flags are unavailable. Explicit-year selection appears in selectedYear; otherwise deficits defaults to latest period no later than the current year. Proposed/draft and enacted-document labels reflect source titles, not independently verified current legislative status. Document totals are not parsed.

`/agent/api/public-finance`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Public news feed

Public news response with publisher links and publication dates. Reports remain source claims, not independently verified observations.

`/agent/api/news`

Shared military-world OSINT projection

Existing public world-OSINT projection used by the military workspace. Receiver gaps, source clocks, source-limited samples and licence/access states retained. Aircraft flags are not mission/intent; machine-coded or publisher reports are not verified positions; monthly events and facilities are historical/reference. No owner-configured layers, private workspace or new provider entitlement.

`/agent/api/military-world-evidence`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Shortage Mentions

Public indexed source-text mentions, bounded500results/query with actual provider pagination. Article URLs deduplicated; syndication can remain. Country-name/source-dossier context is not a verified shortage location. Risks, denials and resolution wording are labelled. Counts are not confirmed shortages, events, severity or predictive scores. Original dates retained; undated only with days=all. Selected-language lexical coverage is incomplete. No private/source-force/arbitraryURL access.

Spatial Research

Reviewed public JSON metadata for air-quality observations, public transit vehicle positions, public camera catalogues, street-photo references and NASA HLS granules. Original observation/capture clocks, provider licences, coverage bounds and unavailable-source states retained. No private drawings/imports/scenes, owner credentials, Mapillary token access, binary images, pixels, camera playback or arbitrary URLs. No forced refresh or bypass of provider pauses/backoff. Native pagination covers the captured source selection; it does not imply complete upstream coverage.

`/agent/api/spatial-research`

Route access: professional. Preserve source-native pagination and coverage qualifications.

Stored daily prices and source revisions

Persistent provider bars and discovered instrument identities. Use view=instruments, then view=bars with exact symbol/provider/instrument and dates; bar-versions preserves source corrections. Provider daily bars are separate from sampled quotes and model outputs. Original bar clocks/units/currency and missingness retained.

Watchtower Data Points

Current normalized aggregate, not the complete specialist dataset catalogue. Read all pointer pages under /points and other returned fields using the same MCP snapshot. Use list_data_routes for specialist views such as Energy, taxes, weather, aviation and Flock. Source timestamps, stale/partial flags and unknown values remain authoritative. Returns the complete current normalized points collection, including newly available points without a fixed point-count assumption. Use selector /summary for coverage, /points for paginated JSON Pointer fields, and keep the MCP snapshot while reading array entries. For an individual point use watchtower-data-proof with its id. Source availability and original timestamps remain authoritative; MCP field pages are not new observations.

`/agent/api/watchtower-data-points`

Registered source packs

AIS / Port-Call History

Add port-call timelines, AIS gaps, identity changes, dark-activity history, sanctioned-vessel routing, chokepoint dwell time, and cargo-flow corroboration.

`/agent/api/next-data-source-packs`

Providers: MarineCadastre historical AIS, Spire Maritime, MarineTraffic, ORBCOMM, Global Fishing Watch context. Registration is not proof of usable records.

Aviation Accident History

NTSB legacy downloads currently redirect to HTML and the replacement Enterprise API requires an authenticated contract; no accident records are claimed.

`/agent/api/next-data-source-packs`

Providers: U.S. NTSB. Registration is not proof of usable records.

Canada Contract Awards

Contract, department, vendor, value, amendment, commodity, and reporting-period records under the Open Government Licence Canada.

`/agent/api/next-data-source-packs`

Providers: Government of Canada Open Data. Registration is not proof of usable records.

Capital Controls / FX Restrictions

Add country-level restrictions for cash withdrawals, FX rationing, import controls, bank holidays, crypto bans, gold/cash restrictions, and exit taxes.

`/agent/api/next-data-source-packs`

Providers: IMF AREAER, central bank notices, finance ministry notices, official gazettes, bank holiday / withdrawal-limit notices. Registration is not proof of usable records.

Environmental Enforcement

Bounded active-facility profile with facility identifiers and compliance state; allegations and final enforcement dispositions remain distinct.

`/agent/api/next-data-source-packs`

Providers: U.S. EPA ECHO. Registration is not proof of usable records.

EU Procurement Intelligence

Published EU procurement notices, buyers, suppliers, sectors, regions, values, lots, and revisions from a bounded official search window.

`/agent/api/next-data-source-packs`

Providers: EU TED. Registration is not proof of usable records.

European Disease Surveillance

Explicitly allowlisted aggregate ECDC dataset shown as archived; generic ECDC dashboards and restricted surveillance are not collected.

`/agent/api/next-data-source-packs`

Providers: ECDC. Registration is not proof of usable records.

Flood Insurance Losses

Privacy-redacted claim, event, payment, damage, coverage, flood-zone, and coarse geographic observations; exact properties are never inferred.

`/agent/api/next-data-source-packs`

Providers: OpenFEMA NFIP Claims v3. Registration is not proof of usable records.

Government Gazette / Legal Change Parser

Parse emergency decrees, capital controls, digital-ID/CBDC rules, asset seizures, tax changes, trade controls, firearms/self-defense law, and property-rights changes.

`/agent/api/next-data-source-packs`

Providers: Federal Register, EUR-Lex, UK legislation, Canada Gazette, official gazettes and legal bulletins. Registration is not proof of usable records.

Historical U.S. Coastal AIS

Verified 2025 aggregate vessel-transit-count layer; raw historical AIS remains external-pipeline-only, U.S. coastal, lagged, and not global current tracking.

`/agent/api/next-data-source-packs`

Providers: NOAA Marine Cadastre. Registration is not proof of usable records.

Money-Market Fund Exposures

Recent official N-MFP3 and amendment filing identities; holdings, issuers, counterparties, repos, and liquidity require bounded filing XML ingestion.

`/agent/api/next-data-source-packs`

Providers: SEC EDGAR N-MFP3. Registration is not proof of usable records.

Passport / Residency / Exit Mobility

Community-maintained passport-to-destination visa-requirement baseline. Not an official or current legal source; verify with destination authorities. Residency, tax, extradition, exit controls, and capital mobility are not included.

`/agent/api/next-data-source-packs`

Providers: imorte/passport-index-data, Passport Index-derived community data. Registration is not proof of usable records.

Sanctions Entity / Vessel / Ownership Graph

Link sanctions targets to companies, beneficial owners, vessels, banks, crypto exposure, jurisdictions, commodities, and maritime routing evidence.

`/agent/api/next-data-source-packs`

Providers: OpenSanctions, OFAC, EU Sanctions Map, UN Consolidated List, UK OFSI, OpenOwnership BODS, vessel registry / IMO context. Registration is not proof of usable records.

Severe Weather Loss Events

Corrected yearly details, fatality, and location releases for hazards, reported losses, injuries, deaths, and narratives.

`/agent/api/next-data-source-packs`

Providers: NOAA NCEI Storm Events. Registration is not proof of usable records.

Structured Election Calendar

Source-bounded global election dates and rounds, chamber compositions, party classifications, exact venue contracts and media evidence. Date precision, source revisions, missing coverage and institution-specific rules are explicit. IFES/IDEA restricted data is not ingested.

`/agent/api/next-data-source-packs`

Providers: Wikipedia contributors · CC BY-SA, United Nations, European Parliament, Polymarket, Kalshi. Registration is not proof of usable records.

Subnational AnCap Policy Layer

Add state/province/canton/emirate-level tax, self-defense, homeschool, business, property-rights, asset-protection, and crypto-policy scoring.

`/agent/api/next-data-source-packs`

Providers: Tax Foundation, NCSL, state/province tax departments, official legislative databases, subnational firearm/self-defense/property/homeschool sources. Registration is not proof of usable records.

U.S. Power Asset Ownership

Official utility, plant, generator, operator, owner, ownership-share, capacity, technology, and status release inventory; row import requires the bounded annual XLSX pipeline.

`/agent/api/next-data-source-packs`

Providers: U.S. EIA Form 860. Registration is not proof of usable records.
